48 to 72 hours following coprine-containing mushroom ingestion, if ethanol ingestion occurs, toxicity ensues. Within 0.5 to 2 hours of ethanol ingestion, an acute disulfiram effect is noted, with tachycardia, flushing, N/V. The simultaneous ingestion of the mushroom and alcohol does not result in immediate clinical manifestations.	Antiemetics, Fluid resuscitation, Fomepizole for refractory toxicity	Coprinopsis insignis	–	Agaricomycetes Psathyrellaceae	aldehyde dehydrogenase inhibitor	Coprine
